PROFESSIONAL SUMMARY

Full-stack engineer with 5+ years of experience who has independently architected and delivered scalable systems across social media, fintech, civic tech, AI platforms, e-commerce, recruitment, multiplayer gaming, and live streaming industries. Experienced in building complete products from scratch, including frontend applications, backend microservices, cloud infrastructure, real-time systems, admin dashboards, mobile applications, CI/CD pipelines, and AI-powered platforms.

Shipped 14+ production-grade projects across 5+ countries, impacting more than 100K+ users. Strong expertise in microservice architecture, AWS serverless ecosystem, scalable backend design, WebRTC, real-time communication, GraphQL, payment integrations, and modern frontend engineering. Passionate about system architecture, performance optimization, and product-focused engineering.

Portfolio & Website: asifahsan.com

EXPERIENCE

Senior Software Engineer — Right Tracks IT

Mohakhali DOHS, Dhaka · 2025 – Present

- Built the entire admin dashboard for ZodoLive from scratch with a modern glass UI system, dynamic themes, analytics dashboard, and enterprise-grade RBAC using AWS Cognito.
- Integrated Agora SDK and Tencent RTC for live stream monitoring, moderation systems, stream supervision, and real-time user management.
- Developed backend services alongside the tech lead, including diamond transaction systems, PK battle mechanics, cron jobs, data migration services, and DynamoDB ↔ PostgreSQL synchronization pipelines.
- Built and deployed the marketing website end-to-end, including SEO optimization and deployment pipelines.
- Developed an AI platform powering Paint (AI image generation) and Vida (AI video generation) applications.
- Implemented unified backend infrastructure and admin dashboard systems for AI content management, categories, sliders, and moderation workflows.
- Integrated Gemini Nano Banana AI pipelines for image/video generation systems.

- Engineered real-time multiplayer gaming infrastructure for LivePlay using Socket.IO and Cocos Creator 3.x.
- Implemented resilient networking systems, including reconnect logic, heartbeat watchdog, intelligent bet batching, live multiplier synchronization, leaderboards, and game-state synchronization.
- Worked extensively with AWS Lambda, AppSync, DynamoDB, PostgreSQL, Cognito, S3, GraphQL, Socket.IO, and CloudFront.

Software Engineer → Senior Software Engineer (Promoted) — Doodle Technologies Ltd.

Mirpur DOHS, Dhaka · 2022 – 2025

- Developed large-scale backend systems for Tribel, a US-based social media platform.
- Built core features including stories, posts, collaborations, feeds, trending systems, and user engagement pipelines.
- Recognized internally as a star contributor for resolving critical production issues and improving overall platform stability.
- Optimized FFmpeg-based media processing pipelines significantly reduce video processing time and server load.
- Integrated AWS Rekognition for automated content moderation, reducing manual review overhead.
- Implemented user retention and engagement systems to improve platform activity and reduce churn.
- Led the Wozaif recruitment platform development and transformed Figma designs into a scalable, production-ready system.
- Designed system architecture for employer, employee, authentication, role management, and multilingual workflows.
- Implemented multilingual support with RTL compatibility.
- Architected and delivered Ticket Tomorrow end-to-end, including frontend, backend APIs, and admin dashboard systems.
- Integrated bKash and SSLCommerz payment gateways with refund workflows, automated emails, invoice generation, and PDF systems.
- Mentored junior developers and contributed to architecture decisions across multiple teams.
- Built SEO-optimized multilingual company websites, achieving Lighthouse scores above 95+.
- Improved inbound leads and organic traffic through frontend optimization and SEO improvements.

Software Engineer — Tech Hack Canada

Banani, Dhaka · 2021 – 2022

- Built a MERN-based remote job platform connecting Bangladeshi professionals with Canadian remote opportunities.
- Designed employer/job seeker workflows and scalable backend APIs.
- Implemented monorepo architecture with shared type systems between frontend and backend.

- Worked on authentication systems, dashboard flows, and application management pipelines.

Junior Full Stack Developer — Bengal Software

Bashundhara RA, Dhaka · 2021

- Developed Pipo Bazar, an in-game top-up marketplace supporting PUBG, Call of Duty, and Clash of Clans.
- Implemented product listing systems, cart flows, checkout systems, and order fulfillment workflows.
- Built backend services for the Azan prayer-time application with REST APIs and an admin dashboard.
- Implemented push notification infrastructure, achieving 98% delivery rate.

PERSONAL & FLAGSHIP PROJECTS

Gunti (Personal Finance & Expense Manager — Android, iOS, Web) · 2026 – Present

- Architected a cross-platform expense management platform powered by 11 independent Node.js microservices with isolated PostgreSQL databases.
- Integrated SMS auto-parsing for 6+ Bangladeshi banks and mobile wallets.
- Integrated payment systems, including bKash, Nagad, SSLCommerz, Google Play Billing, and Apple In-App Purchase.
- Built AI-powered financial analytics and spending insights using OpenAI APIs.
- Implemented local-first architecture using Room DB, CoreData, and Serwist PWA background synchronization.

Nexus RTC SDK · 2025 – Present

- Developed a custom real-time communication SDK with a proprietary signaling layer and media engine.
- Achieved sub-50ms end-to-end latency in controlled test environments.
- Worked with WebRTC internals, Kubernetes orchestration, Redis, ClickHouse, and AWS infrastructure.

Uppsala Central Gross (Sweden — Grocery E-Commerce) · 2026 – Present

- Built a complete grocery e-commerce ecosystem, including REST APIs, customer SPA, admin dashboard, and Android application.
- Designed Prisma schema architecture with JWT authentication, RBAC, SSE-based real-time notifications, and bilingual support.

SocialHive (Social Media Platform — Full Stack Microservices) · 2025

- Engineered a social media platform powered by 16 microservices behind an API gateway.
- Designed a 68-model PostgreSQL schema and implemented 8 feed algorithms.
- Implemented OAuth authentication, JWT security, RBAC, real-time messaging, infinite scrolling, and notification systems.

Nagorik (Civic Issue Reporting Platform — Bangladesh) · 2025

- Built a bilingual civic issue reporting platform powered by 5 microservices.
- Implemented dynamic RBAC with 9 roles and 33+ permissions.
- Developed issue lifecycle management and location-based issue discovery systems across the Bangladesh administrative hierarchy.

TECHNICAL SKILLS

Frontend: React, Next.js, Angular, Redux Toolkit, Zustand, React Query, Tailwind CSS, Shadcn UI, TypeScript

Backend: Node.js, Express, GraphQL, REST APIs, Microservices, Prisma, Zod

Cloud & DevOps: AWS Lambda, AppSync, S3, Cognito, DynamoDB, EC2, Docker, Kubernetes, Terraform, CI/CD, DigitalOcean

Real-Time Technologies: WebRTC, LiveKit, Agora SDK, Socket.IO, WebSockets

Databases: PostgreSQL, MongoDB, Redis, DynamoDB, SQLite

Mobile Development: Kotlin, Jetpack Compose, Swift, SwiftUI, Android MVVM

AI & Automation: Gemini Nano, Banana AI, OpenAI API, Claude API, AI pipelines

Languages: TypeScript, JavaScript, Kotlin, Java, SQL

Tools & Infrastructure: Git, GitHub, FFmpeg, Firebase, CloudFront, Linux

EDUCATION

BSc in Computer Science
BRAC University · 2016 – 2020

LANGUAGES

Bangla — Native
English — Professional
